constants Package Example (Version 1.1)

Baptiste Auguié

April 13, 2012

1 Introduction

This document provides examples of using the `constants` package in R.

```
> library(constants)
> ls("package:constants")

 [1] "L2eV"              "L2w"                "compare.material"
 [4] "drude"             "drudeFit"           "eV2L"
 [7] "epsilon2nk"        "fano"               "fortify.material"
[10] "ggplot.material"   "lorentz"            "material.predict"
[13] "nm2um"             "normalise.material" "permittivity"
[16] "predict.material"  "spline.material"    "t2eV"
[19] "um2nm"             "w2L"
```
